

## WALL LADDERS

VTT Verification Certificate VTT-VA-00001-18

 <p>VTT EXPERT SERVICES OY VARMENNUSTODISTUS VTT-VA-00001-18</p>	<p>Orima-Tuote Oy Kankaantie 6 FI-16300 Orimattila Tel. +358 3 872 100 www.orima.fi</p>
<p>Product:</p>	<p>Orima® Wall ladder</p>
<p>Intended use:</p>	<p>Prefabricated accessory for roofing – ladders for mounting the roof of a building or another level</p>
<p>Suoritustasot:</p>	
<p>1. Dimensions</p>	<p>a. Width of rung 400 mm b. Step interval 300 mm c. Rung diameter 25 mm d. Distance between rung and wall &gt; 200 mm</p>
<p>2. Thickness of coating</p>	<p>Zn 20 µm + powder stove painting min 60 µm</p>
<p>3. Load and torque capacity</p>	<p>a. STATIC LOAD CAPACITY, Rung • Bend at 1.5 kN load: max 5 mm • 2.6 kN load: Load capacity b. STATIC LOAD CAPACITY, Side support • Bend at 1.5 kN load: 1/100 of length of support interval, max 10 mm • 2.6 kN load: Load capacity c. STATIC LOAD CAPACITY, Ladder mounting and support • 2.6 kN load: Load capacity d. TORQUE CAPACITY, Ladder rung mounting • 50 Nm torsional strength test: Load capacity e. DYNAMIC LOAD CAPACITY, Ladder • 100 kg load from falling mass, dropping height 2,500 mm: Load capacity f. DYNAMIC LOAD CAPACITY, Ascent rail • 100 kg load from falling mass, dropping height 2,500 mm: Load capacity</p>
<p>4. Corrosion</p>	<p>Loading and durability class at 240 h condensate test C4 fair*</p>

\* Requirement for prefabricated accessories for roofing: C3 medium.
